

Slow Down For Eagles

- Though outstanding hunters, Eagles have a very high failure rate
- Combined with shrinking habitats, they often feast on roadkill

An Eagle with a Full Crop

- A large meal increases the weight of an Eagle
- Extra weight creates added difficulty to resume flight and return to cover

Eagles are Large

- Please slow down as a large, heavy Eagle needs time and distance to get off the road
- Unlike smaller birds, Eagles cannot dart away from vehicles
